

## Excel Practice test formulas

De files welke bij deze practice test horen vind je in de folder Exam files

### Complete the following tasks:

- A. On the US Cities worksheet, insert a function in cell *G3* that references the value in cell *G2* and returns the associated state name (*C4:C380*) from the cell range *B4:C380* based on an exact match.
  
- B. On the Customer Profiles worksheet, insert a function in cell *E2* that sums the number of cars owned (*E6:E55*) for only those customers with an occupation (*B6:B55*) of Clerical.
  
- C. On the USD worksheet, insert a formula in column D that displays the text YES if the average exchange rate of 2003 (column C) is higher than that in 2002 (column B) otherwise the text NO should be displayed.
  
- D. Use the State workbook. In Range *country code "D4:D184"*, change the formatting to Red fill for every cell where the cell value is equal to US.
  
- E. Use the Cars workbook. Insert a function in cell *G2* that counts only those customers who own 2 or more cars "*G5:G29*".
